# Evolution of Blockchain Technology

- **Bitcoin Era (2008-2013)**

The inaugural phase of blockchain technology characterized by the creation of Bitcoin by Satoshi Nakamoto. It paved the way for decentralized currency.

- **Ethereum and Smart Contracts (2013-2017)**

The introduction of **Ethereum** marked a significant advancement in blockchain, enabling smart contracts that automate transactions without intermediaries.

- **Diversification and Interoperability (2017-2020)**

A period of rapid growth in the blockchain ecosystem, leading to the emergence of various blockchain projects that focus on interoperability and functionality.

- **Enterprise Adoption and Scalability Solutions (2018-Present)**

Increased interest from enterprises in implementing blockchain solutions, alongside the development of **scalability** strategies to enhance performance.

- **Decentralized Finance (DeFi) Boom (2020-Present)**

The rise of DeFi platforms has transformed traditional finance, enabling users to engage in financial services without intermediaries.

- **NFTs and Web3 (2021-Present)**

The inaugural phase of blockchain technology characterized by the creation of Bitcoin by Satoshi Nakamoto. It paved the way for decentralized currency.

# UNDERSTANDING DECENTRALIZED FINANCE

## Introduction of Smart Contracts

Smart contracts enable automated agreements that execute without intermediaries, laying the foundation for DeFi applications.

## Democratization of Finance

DeFi allows users to access financial services directly, promoting financial inclusion and reducing reliance on traditional banks.

## Borrowing and Lending

Users can lend and borrow assets in a trustless environment, eliminating the need for centralized authority.

## Trading Digital Assets

DeFi platforms facilitate peer-to-peer trading of digital assets, increasing market accessibility and liquidity.

## Financial Inclusion

DeFi has the potential to provide underserved populations with access to financial services, promoting economic growth.

# Advantages of SigmaChain

Experience next-generation Blockchain with Sigmachain — a 100% decentralized, secure, and seamless ecosystem built for innovation and user empowerment.

## Technology

Secure critical business insights with our solutions, including Mainnet and DApp.

## Security

Experience smooth transaction processing and robust security with our independent Mainnet.

## Flexibility

Our integrated API supports all types of services and operating models.

## Easy to Use

We support customers in utilizing blockchain technology for their individual businesses.

# OUR VISION AND MISSION

At **Sigma Chain**, our mission is to empower millions through global connection and financial literacy, fostering personal and community success.

## MISSION

**Sigma Chain** envisions a future where **decentralized finance** is accessible to everyone, regardless of **geographical location** or socioeconomic status.

## VISION

Our **mission** is to accelerate the transition to **DeFi 2.0** by providing a comprehensive suite of **decentralized financial services** that are scalable, interoperable, secure, and user friendly.

## VALUES

We are committed to fostering financial inclusion, empowering individuals to take control of their financial destinies, and creating a more equitable and transparent financial system for the benefit of all.

# Understanding Sigma Tokenomics

SIGMA CHAIN

## Purpose of SIGMA Token

The SIGMA token is integral for transaction fees, governance voting, and accessing platform incentives, ensuring a robust ecosystem.

01

## Total Supply Cap

02 The capped total supply of SIGMA tokens is designed to promote scarcity and enhance value appreciation over time.

## Governance Mechanism

Token holders can participate in governance voting, influencing the future development and direction of the SIGMA platform.

03

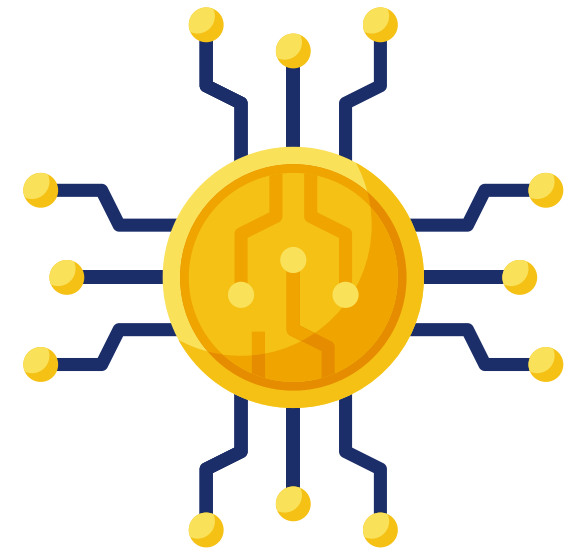

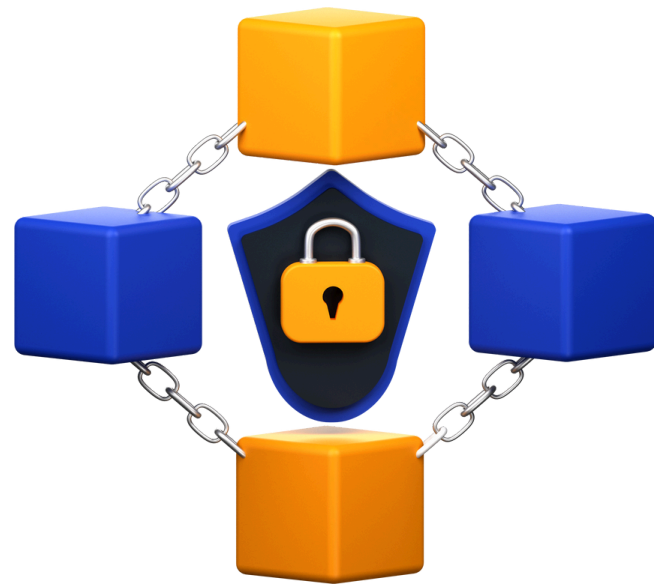

## Incentive Participation

04 Users can leverage SIGMA tokens to engage in various platform incentives, fostering user engagement and loyalty.

04

## TERMS & CONDITION

- Minimum Withdrawal limit is **10 SCW** (multiple of **1 SCW**)—requests below this will be **rejected**.
- **Gas fees and service charges** will be deducted during the transaction.
- You can **track the transaction status** in your SigmaChain account.
